

### PortaMEe Baby Carrier

A "Hip" Baby Carrier

I always tend to carry my kids on my right hip. It's more comfortable for me, but it's also more limiting since I'm not as good with my left hand. The PortaMEe Baby Carrier is a wonderful ergonomic carrier that allows me to comfortably and securely carry my baby or toddler, and have the freedom to use both hands. The lumbar support has been saving my back (pregnancy was bad enough, why have back pain after delivery?) and the gel pad on the shoulder strap does not dig into my shoulder!

Plus, the PortaMEe Baby Carrier has perfectly placed pockets for all of my essentials. It's so easy to get to my cell phone, there's a hook for my keys, an attached wallet with zipped pockets, and even more. The bottle holder is detachable and there are so many ways to adjust the PortaMEe Baby Carrier to find your perfect fit. It's designed for babies 5-18 months (15 - 35 lbs) but you can also purchase an infant headrest to start using it as early as 6 weeks (8 lbs). The hooded cape (sold separately) provides additional warmth and protection in inclement weather. You'll love this "hip" baby carrier and your baby will love being able to see you and the world comfortably!

Mom Tip: The PortaMEe website offers many wonderful comfort tips and clear instructions to make sure you are comfortable while carrying your baby!
